

## THE CLUELESS RETARD

Last night (Thursday July 6), President Trump at a rally in Great Falls, Montana, described Maxine Waters as a “low-IQ individual... somewhere in the mid-60s.”

We call liberals “*Libtards*” because no matter how smart they are, they have allowed their emotions to turn their brains into mush. Maxine, however, is an actual retard. The President has described her accurately.

From *Human Rights Watch* -- [Mental Retardation: An Overview](#):

“Intelligence quotient (I.Q.) tests are designed to measure intellectual functioning. An I.Q. score provides a rough numerical assessment of an individual's present level of mental functioning in comparison with that of others. The vast majority of people in the United States have I.Q.s between 80 and 120, with an I.Q. of 100 considered average.

To be diagnosed as having mental retardation, a person must have an I.Q. below 70-75, i.e. *significantly* below average. If a person scores below 70 on a properly administered and scored I.Q. test, he or she is in the bottom 2 percent of the American population<sup>10</sup> and meets the first condition necessary to be defined as having mental retardation.

Although all persons with mental retardation have significantly impaired mental development, their intellectual level can vary considerably. An estimated 89 percent of all people with retardation have I.Q.s in the 51-70 range. An I.Q. in the 60 to 70 range is approximately the scholastic equivalent to the third grade.”
